Hibiscus TBC Specification

Choose whole calyces when appearance matters in a loose blend, or discuss cut and TBC grades for tea bags and further processing. Our current hibiscus TBC sheet describes a target cut of 1-3 mm; the final size distribution is agreed with the buyer. Beverage producers should share their desired infusion colour, flavour and processing conditions when requesting samples.

Parameter	Specification
Botanical name	Hibiscus sabdariffa L.
Composition	100% dried hibiscus calyces
Cut size	Target 1-3 mm; buyer-specific sizing available
Colour	Natural deep ruby red to burgundy
Additives	None

Specification, not a batch-specific Certificate of Analysis. Final grade and commercial terms are confirmed in the quotation.
